## **PRESS RELEASE**

### **ENTR™ Gives You the Power to Control Your Home Entrance Doors**

*Mul-T-Lock®'s ENTR™ is the latest advancement in convenient, smart locking for the home market*

**Tel-Aviv, ISRAEL, Date XX, 2015 – MUL-T-LOCK®** today announced the release of ENTR™, an innovative *smart lock solution* that provides users with a variety of ways to open doors without the use of physical keys. A comprehensive solution, ENTR™ conveniently allows users to securely control access to their home or office using any connected device such as a smartphone, tablet, or with the use of a personal code, fingerprint reader or a remote control.

ENTR™ combines the strength of a Mul-T-Lock®'s High Security mechanical cylinders together with advanced electromechanical and digital technology to create a simple-to-use *smart lock* solution for the both home and office use. Leveraging today's widespread use of smartphones and connected devices, users can unlock doors, program scheduled access authorizations and more.

With ENTR™, you can create virtual keys right from a smartphone or other connected devices. Users can also opt to operate ENTR™ with a coded touchpad, fingerprint reader or remote control. In addition to providing a range of options to gain access, ENTR™ is easy to install — installation takes minutes — as it is wire-free and can be fitted on any door type.

#### **Yair Levy, Product Manager , Mul-T-Lock®**

“ENTR™ provides users with an easy to use and install *smart lock* solution that leverages the convenience of today's connected world. It is an excellent way for our partner locksmiths to easily branch out into smart and advanced solutions while they provide their customers with a solution that addresses many of their security needs.”

No longer reliant on keys, ENTR™ is an ideal solution for a wide range of users. Families with children no longer have to worry about lost keys and the inability to access the home because of it. Individuals who want a digital solution can use their smartphone for home access control. It's also a very smart solution for the elderly, as it provides secure access to caregivers or visitors without having to distribute keys. Future plans for ENTR™ include the ability to integrate with the smart home environment, giving consumers the control and convenience they want.

#### **About Mul-T-Lock®**

For more than 4 decades, Mul-T-Lock® has been designing, manufacturing, marketing and distributing innovative high security locking solutions to people, places and organizations globally. Adhering to the world's most stringent standards, Mul-T-Lock® High Security solutions are at work on every continent, in nearly 70 countries, and securing over 100 million users.
