

# FleX Control Cylinder

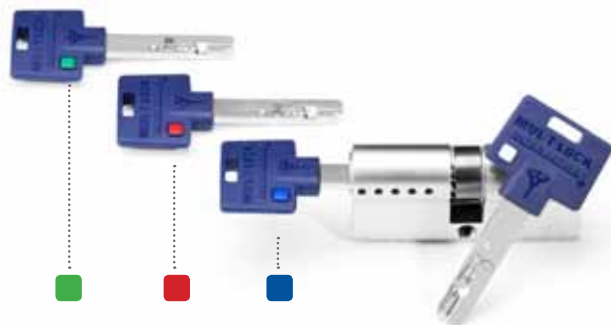

# FleX Control Cylinder

## Simple. Convenient. Flexible.

Just because you want to give someone access to your home or business some of the time, doesn't mean you want them to have access all of the time. Combining convenience with simplicity, the FleX Control cylinder gives you the ability to control entrance access with an easy-to-use, mechanical solution.

With every FleX Control cylinder you'll receive a set of four color-coded keys. The white one is for anyone you want to have full-time access, such as you and your family members or key employees, and the blue key is for those you want to have limited access and at the times you decide. Using the red and green keys allows you to control the blue key holder's access.

## Get control with the FleX Control Cylinder:

- Provide access when and to whom you want to, and then limit it when you don't
- Ideal for use with domestic staff, temporary workers and even full-time employees
- Simple to use and install – no wiring, software or expensive electronic systems

## FleX Control Cylinder Benefits

**Your Choice** – Decide when and for how long you want to provide blue key holders premises access.

**Extra Efficient** – No need to replace the cylinder or collect all keys to prevent access.

**Cost Effective** – Replaces the need for additional locks that are often installed to provide access control.

**Highly Reliable** – Field-proven, Mul-T-Lock's High Security solutions have been protecting people, places and property for close to four decades.

## FleX Control Cylinder Features

**Flexible Format** – Suitable for cylinders of any length.

**Available in Mul-T-Lock's telescopic pin platform, Interactive+.**

**Controlled Duplication** – One duplication card for all keys is supplied, with key duplication available with the card and through authorized Mul-T-Lock locksmiths.

**Easy Installation** – As simple as installing any regular cylinder.
