

Integrator®
Patented Key Control For Enhanced Security

Integrator® Affordable Patented Key Control

With any locking system, security is only as good as the key control it provides. In certain environments, that is especially important to overall security. Mul-T-Lock's Integrator® platform patented key control provides affordable enhanced protection against unauthorized key duplication, helping to ensure your home and business customers' security. The Integrator® range includes cylinders, deadbolts and padlocks, to cover all locking needs.

Mul-T-Lock's Integrator® provides affordable enhanced protection

Integrator® Makes Quality Affordable

Mul-t-Lock's patented, high precision technology ensures reliable system functionality as well as intrusion protection. Based on Mul-T-Lock's proprietary 7-pin tumbler mechanism, special launcher pin is inserted into the relevant plug chambers of the cylinder, which correspond to Integrator's oval key cut. Additionally, the special cuts on Integrator® keys are available in three different configurations: internal, external and twin cut, allowing you to have your own an exclusive profile.

Additional Protection via Key Control

The Integrator® patented key and key blank provide increased control over key cutting to achieve high levels of key security. Key duplication can only take place upon presentation of a Mul-T-Lock key card and through an authorized Mul-T-Lock locksmith in accordance with Mul-T-Lock key cutting procedures. Not only does this help limit unauthorized key duplication, it also helps you maintain ongoing contact with your customers.

Integrator® Benefits

Ideal for both residential and business customers, you'll be able to provide them with a locking solution that addresses their diverse needs.

- Affordable and Effective - an entry-level, solution that goes beyond the standard, offering advanced, patented technology and protection, complying with the highest applicable standards
- Easy Retrofit - on any existing hardware
- Advance Key Control - key ordering authorization cards must be presented to an authorized Mul-T-Lock dealer for any key duplication. Moreover, Integrator's restricted key system is patented until 2023 for guaranteed legal protection against unauthorized key duplication
- Supports Dual-level Security - can be integrated with other cylinder platforms such as the Mul-T-Lock's 7x7, to provide varying levels of security, maximizing your customer's security spend

Complete Range of Keying Options

Integrator® provides your customers with a variety of keying options together with a masterkeying hierarchy for different locking products and environments.

Construction

Provides access to multiple doors with a common key, then instantly switches to unique combinations when necessary, rendering the common key useless once construction is completed

Master Key System

Assign various levels of access for different key holders

Keyed Alike

Access multiple doors with a single key

Emergency

Operated with keys inserted and rotated on opposite sides, enabling both sides to be permanently operational

3 in 1

Instantly change a lock's combination up to 2 times by simply turning a key

Break Secure

Designed to snap off when attacked, leaving the main portion of the cylinder intact and fully functioning
