

CLIQ® ensures high security for your most precious buildings

Protect your landmarks and their contents with the safe and cost-effective access control solution

Heritage buildings and museums trust CLIQ®. Why? Because museum security is an art in itself

“One of the fastest heists of all time saw 4 masterpieces, including paintings by Monet and Van Gogh, stolen in just 3 minutes from the E. G. Bührle Collection in Zürich.”
How Stuff Works

Museums educate and engage the public; protect and promote our heritage; and inform us about the history of other cultures. As public spaces, museums often need the revenue their visitors provide, including entrance fees, special exhibition tickets, and purchases from a café or shop. Creating a safe, welcoming, open environment, which encourages people to keep coming back, is a primary mission. Yet this “open access” must be carefully balanced with museum security. Galleries, for instance, appear to be facing a rise in armed robbery over the past decade.

The goal of museum security is not to close its doors, but to make sure they remain open to visitors in a responsible manner.

This heritage building relies on CLIQ® to meet its security needs

Deutsches Theater, Berlin, Germany

Security managers at the Deutsches Theater chose CLIQ®, a mechatronic locking system which integrates cutting-edge microelectronics and intelligent data encryption into a high-quality electromechanical locking cylinder system. CLIQ® makes life easier for security managers.

CLIQ® locks are wireless, so there were no major alterations needed to the existing door hardware – a critical feature when refitting an historic building. “The CLIQ® locking system offers the Deutsche Theater a safe and flexible solution.”
Torsten Kant, Regional Sales Manager North-East Germany at ASSA ABLOY

*“Selling stolen artefacts is the third-most profitable wing of the black market, after drugs and weapons.”
Smithsonian Magazine*

Introducing CLIQ® The complete access control solution for your most precious properties

High security for your valuable buildings:

Mechanical precision and microelectronic modules combine in CLIQ® technology that's reliable and very secure. Worrying about theft is a thing of the past, thanks to real-time audit trails and keys that can be revoked electronically any time you want, even if you are off-site.

System flexibility: multiple access points are available. You can now easily manage your building's constantly changing access needs.

The CLIQ® system is suitable for many different types of locking points, securing artefacts no matter where in the building they are exhibited or stored.

Simple and efficient: You won't find another system easier to install or maintain. With CLIQ® there is no wiring needed on cylinders or padlocks. Replacing a key's battery is super fast, and the only regular maintenance you will need. Your facility staff save time and the museum saves money, because there's no need to invest in extra monitoring devices.

€10 million theft in under an hour? In 2012, 7 masterpieces by Picasso, Monet, Gauguin and others were stolen from the Kunsthal Rotterdam. Allegedly inadequate security measures assisted the thieves.
CFPA

CLIQ®:
Trusted to secure culture

Vasa Museum, Stockholm, Sweden

CLIQ® protects Sweden's marine cultural heritage. The CLIQ® system includes 700 cylinders and could be installed without requiring the doors to be modified before mounting the cylinder and without any wiring.

"Now the three museums have an electromechanical system that makes it easy to block keys."
Michael Andrésen, Operations and Security Officer at the State Maritime Museums, Sweden

Fastnet lighthouse, Fastnet Rock, Ireland

"The Fastnet lighthouse is one of the most iconic lighthouses in the world, so we are extremely proud that CLIQ® padlocks are the chosen solution for securing this site."
Pat Jefferies, Commercial Director at Abloy UK

Components of the CLIQ® system

Software to manage access rights for different users, different doors and different times

Range of programming devices to transfer and update access rights for keys, also remotely

Programmable, battery-powered keys

Wide range of programmable cylinders to lock different access points

The CLIQ® system allows you to secure these locking points with programmable keys & cylinders

Invest in CLIQ®...

- No wiring required, no disruption of aesthetics
- Easy installation process, multiple access points
- Cost-efficient, e.g. lost keys can be blocked
- Flexible access control
- Audit trail of entries easy to monitor

CLIQ® is a security locking system with high end microelectronics, programmable keys, and cylinders. The system offers a variety of combinations of mechanical and electronic systems to match different security and flexible access needs. Available on the global market place, it provides flexible access and key management solutions for all kinds of locking applications. A wire free system, each key can be programmed and updated individually to allow access to specific areas at specific times and dates, accommodating constantly changing access requirements and ensuring maximum flexibility. The power is provided by a battery inside the programmable CLIQ® key.

The intuitive software makes it simple to manage access rights, enable and disable keys and customize access schedules, on site or on the go. ASSA ABLOY can also host your data securely for complete peace of mind.

About Mul-T-Lock®

For more than 4 decades, Mul-T-Lock® has been designing, manufacturing, marketing and distributing innovative high security locking solutions to people, places and organizations globally. Adhering to the world's most stringent standards, Mul-T-Lock® High Security solutions are at work on every continent, in nearly 70 countries, and securing over 100 million users. Using advanced and patented technologies, Mul-T-Lock® stays a step ahead of the market by anticipating customers' security and operational needs. As a member of the ASSA ABLOY Group, and with availability through over 20,000 authorized and trained service centers, customers rely on Mul-T-Lock® to provide proven, proactive and protective High Security locking platforms.
